

Partners In Crime (feat. Mike Garson)

CSS

If you could only see...
How your magic... Ahhhh! Is working on me...
If I could stop and take the time
We could be partners in crime.If you could only see...
How your magic... Ahhhh! Is working on me...
If I could stop and take the time
We could be partners in crime.Night time... Moonlight,
Tell me the story of what happens in the dark
You always had appreciation for the unknow
Do you know how you made me feel
When you showed me your magic is something real
You left me hungry and left me mesmerized
When you did the impossible in front of my eyesIf you could only see...
How your magic... Ahhhh! Is working on me...
If I could stop and take the time
We could be partners in crime.You call, You call me
Quiet and dangerously
I fall for it... oh boy!
Like butter on the mild heat
Is this a trap? Am i on fire?
Are you a magician? Are you a liar?
I want you... You want me...
You know what? Let's do this!And from the get go, I always thought so... there's
A place where we belong!
And from the get go, I always thought so... there's
A place where we belong!
And from the get go, I always thought so... there's
A place where we belong!
And from the get go, I always thought so... there's
A place where we belong!Can you see sparkles? Well, I see fireworks
This is what you may get baby
When you go down an dirt
And time after time
It could get less bright
But from me expect... Nothing But blinding light!
