

We Apologise for Nothing (Single Version)

Fightstar

Just re-write these words upon my grave
And look down on everything we loved
Loose lips, sink ships and leaders
For this you need to lead us all
For every change that you put down on me
I've re-read this stone a hundred times
Would you stand over these shadows
And embrace our history?
We apologise for nothing
Take the world away from us but
We apologise for nothing
If I could gather strength a final time
And dream up a war to end all wars
Race lists and mist of vengeance
I don't fear your movements anymore
Let's celebrate this change in turning tides
This revolution won't be televised
Would you stand over these shadows
And embrace our history?
We apologise for nothing
Take the world away from us but
We apologise for nothing
Cut me out of all of this
Cut me out of all of this you say
Just cut me out of all of this
Cut me out of all of this you say
Would you stand over these shadows
And embrace our history?
We apologise for nothing
Take the world away from us but
We apologise for nothing
We apologise for nothing
