

Time Is Tickin' Away

C-block

Ahahaahaha
keep it on, keep it on
keep your head on
time is tickin', time is tickin'
tickin' away
uhhohuho
Let's talk about time
tickin' away every day
so wake on up before it's gone away
catch the 411 and stay up like the sun
remind yourself what's done and done
so let yesterday stay with the bygones
keep your body and soul and your mind on
the right track infact you gotta stay on
the real black
don't turn around and don't look back
we trying to take the positive to another level
Red Dogg diggin deep Mr. P got the shouvel
I'll level with you I played in a foul picture
but now I got my mental sewel up like a stitcher
I used to be a "P" try on to clock
"G's" living wild blast
you before you blast me that's the lifestyle
and I could see it on the evening news
it's just another brutha shot
on either stretched doin time
Chorus:
Time is tickin' away
you've gotta - live your life -
day by day
happy or sad, good or bad
life is too short
you've gotta - keep your head -
(Repeat)
Keep your head one more time
and feel the rythm
I'm telling you life is too short
you know the feeling

you want to do more yourself
esteem is in the way
you better take it kid
and live it day by day
but anyway I'm going for mine
I'm still broke it's no joke
they still got me hangin from the rope's
take time and still do the right thing
and not the wrong
so listen to the words of the song
TickTock your seconds away
from the judgement day
so get your mind ready take the Evil's but out way
bring back we cut no slck
we kick fact's
the positive message on this track is exact
the way we feel it
in the nineteen 90's chillin with red
in the mix your find me rewind me
and turn back my mind
thinking about the hornies
in the pen doing time
Chorus
Repeat
Chorus
Once again
CBK on da track
to wake up your mind
who knows what tomorrow night bring
violence - destruction - who knows?
cause time it's slipping away.
The world keeps spinning
around and round
we've gotta keep ourselves
from going down
in a world full of passion
pleasure and pain
the pressure's get into my brain
Chorus
