Bent Backwards And Broken

Cannibal Corpse

Twisting limbs until they break
Contortions wrenching pain
Joints are hyper extended opposite
Fibrous tendons snapBent backwards and broken
Hateful physical control
Opposite ways, elbows bend and pop
Fingers cracking, connective tissue tornUnrelenting warping strain
Knees are shattered
Sinew ripped from bone, ankles give way
Back is arching, spinal pressure builds
Total collapsePredacious entanglement, form is distorted
Grotesque rearrangement, body contorted
Splintering bones causing internal bleedingAbundance of injuries, pain is exceeding
Every joint in the body is turned the wrong way
A debt to the nemesis forcibly paidArching the back, vertebrae crack
Fracture the spine, can't realign
Torque on the neck, structure is wrecked
Amorphous blob, an end to macabreA torturous lesson in physical terms
The only way some people learn
Stretching the body in every direction
Forcing the joints unnatural flexionTwisting limbs until they break
Contortions wrenching pain
Bent, bent, bent, backwards and broken
