Her Name

Will Turpin

She has a way, magical touch
To fill her needs
A look, a stare
A spell you'll be under
Ranging[?] to your needs

Everybody loves her name
She comes around just to play the game
Everybody loves her name
Look around, let the world explain

All of the time, she's been lonely
It's in her mind
Her heart can't take another disaster
True love, she can't find, yeah

Everybody loves her name
She comes around just to play the game
Everybody loves her name
Look around, let the world explain

She's a [long shot?], ordinary not in the room
Night and day
She's a quiet catastrophe
When the nights [roll?], she falls down

Everybody loves her name
She comes around just to play the game, yeah
Everybody loves her name
Look around, let the world explain, yeah

Everybody loves her name
She comes around just to play the game
Everybody loves her name
Walk around, let the world explain
Walk around, let the world explain
Look around, let the world explain
