Every Step

Charlie Winston

You know me, you know my every step
Since you, I feel like no one understands
I know this, I tangled with your lips
Since you, the sun has gone into eclipse
Close our eyes, realize
Running circles in the sun
I'm feeling fine, just losing time
And knowing you're the one
So come with me, come with me
I can't wait till we
Run away 'coz we need no reasons
Run away 'coz we love the night
You know me, you know my every step
Since you, I feel like no one understands
I know this, I tangled with your lips
Since you, the sun has gone into eclipse
Through the dark, make a start
And we'll leave this all behind
Lose the time, free our mind
And we'll build a paradise
Come with me, come with me
I can't wait till we
Run away 'coz we need no reasons
Run away 'coz we love the night
I wanna run away
Run away with you
You know me, you know my every step
Since you, I feel like no one understands
I know this, I tangled with your lips
Since you, the sun has gone into eclipse
You know me, you know my every step
Since you, I feel like no one understands
I know this, I tangled with your lips
Since you, the sun has gone into eclipse
