

On The Cross (save Yourself Mix)

The Used

We kill the faggots, we kill the lesbians
I said goddammit we kill them all
We were taught to kneel and bow our heads
I tried simply standing up instead
Heard rumors of transparent legs
And walks for days and days
These days we reach for so much more
We reached the point where we can't go home
Alone we wait here underground
Amidst the others waiting
So pray then if it makes you feel safe
But all I can is we go our own way
We go our own way, so save us
Who would guess you were the chosen one?
The right place, you were the firstborn son
Once questioned stable state of mind
To spend some time in the gutter
A full collapse, we're caving in
Just wait for faith to kick in
I lost track of time as I stood in line
Amidst the other believers
So pray then if it makes you feel safe
All I can say is we go are own way
So pray then if it makes you feel safe
All I can say is we go are own way
We go are own way, so save us
Over and over and I still cannot believe
We can't save ourselves
Give me a chance up on the cross and watch me bleed
Now ask for help
Having faith in something you can't see
Takes something else
Over and over and I still cannot believe
We can't save ourselves
So pray that if it makes you feel safe
All I can say is we go are own way
So pray then if it makes you feel safe
All I can say is we go are own way
Send your prayers our way to save us

Kill 'em again 'cause they didn't die hard enough
