

Rites of Passage

Third Eye Blind

Break-ups, blowjobs and black guys
Basements and goodbyes, now
And you're all freaked out
Trying to find out what your life's about
In your soul, there's a broken bone
'Cause hope's so far, so far from home
And you got let down by Occupy
Can't find the ties that bind I wish I could help you through this phase
It's like Bowie says
You pretty young things, you go through ch-ch-changes
Don't take the world they left behind us
Don't let them find us Something you can't come back from
Something's lost and something's won
What's done is done
Move on to another one
It's rites of passage
It's just rites of passage I used to think my thoughts were depraved
Too low to be saved
All shadow and shade
So scared for even thinking
Even diamond dogs have their days It's like Bowie says
You pretty young things, you go through ch-ch-changes
Don't take the world they left behind us
Don't, don't let them find us (don't let them find us) Something you can't come back from
Something's lost and something's won
What's done is done
Move on to another one Rites of passage (rites of passage)
It's just rites of passage (rites of passage)
Rites of passage (rites of passage)
It's just rites of passage Can't stop it coming now, you
I'm still a man, you're gonna die Something you can't come back from
Something's lost and something's won
This pain's the same now for everyone
It's rites of passage
It's just rites of passage
Rites of passage
It's just rites of passage (Something you can't come back from) break-ups, blowjobs and black guys
(Something's lost and something's won) make the call and save the ball
(What's done is done, move on to another one)

Rites of passage (rites of passage)
It's rites of passage (rites of passage)
It's just rites of passage (rites of passage)
I wish I could help you through this phase Yea, that's not the one
Yea, that's not the one
Yea, that's not the one
Woah-oh, woah-oh, oh Yea, that's not the one
Woah-oh, woah-oh, oh
I believe that all believe in one
I believe in all, and hope for the one
Woah-oh, woah-oh, in the one
In the one
