

Time

Rebel Meets Rebel

We have one nanosecond
In the spectrum of time
Cause it's about the dead
It's all in your mindReality, senility
Human race, outer space
My head's about to overload
Explode, explodeAlien forces live inside my brain
I must obey them or I'll go insaneProcreation, cocentration
Penetration, ejaculation
My head's about to overload
Explode, explode
Explode, explodeCold shots on the rocks
You know how it makes me feel
You better see, set me free
Don't give me no better deal
Anagram, sonogram
Looking for a thing that's real
All for sale, new ghost townTime is something you can't steal
Time is something you can't steal
Time is something you can't stealThis black painted sign says:
"Jesus saves"
Ride on the highways
To an early graveRemorse, intercourse
Voices from my alien force
My head's about to overload
Explode, explodeCowboys From Hell on the radio
Turn it up now
Just as loud as it will goGuitar bastards, cymbal crashers
Strobe light flashin', motel bashin'
My head's about to overload
Explode, explode
Explode, explodeCold shots on the rocks
You know how it makes me feel
You better see, set me free
Don't give me no better deal
Anagram, sonogram
Looking for a thing that's real
Ultrasound, vocals downTime is something you can't steal
Time is something you can't steal

Time is something you can't steal We have one nanosecond
In the spectrum of
Time is something you can't steal Time is something you can't steal
Time is something you can't steal Time is something you can't steal
Time is something you can't steal We have one nanosecond
In the spectrum of time
Time is something you can't steal
