Skywire

Common Children

Tear the soul out for your taking
And it's easier on me mostly when I'm faking
So I stare through the wires
And I crawl through myself in this nightYou tell me in the morning
How the night was all we needed
I'm staring through this wire
To see the skyTwist the mind out, sit and scold me
It's a crazy kind of shelter when you hold me
And I crawl Like a child
Yes, I fall like a drunk man into blindnessYou tell me in the morning
How the night was all we needed
I'm staring through this wire
To see your face, to see your eyes
To see the skyYou tell me in the morning
How the night was all we needed
I'm staring through this wire
To see your faceYou tell me in the morning
How the night was all we needed
I'm staring through this wire
To see your sky
