Party Girl

Miranda Cosgrove

Quarter past five and it feels like another dimension
Everybody knows that were goin' out tonight
Somebody says no and thats when I remember to mention
Were gonna party party like its 1999
So pick me up let's go
Go far away from home
It doesnt matter where 'cause baby I just wanna roam
We're putting on a show
Varieties and vogue
Lets do it
Lets do it
Lets do it
You can take the darkness out of the night
You can take the tick-tock out of time
Go and take the angry out of the world
But you can't take the party
You can make a rocket blast into space
You can make the earth into a better place
Go and give me diamonds, rubies, and pearls
But you can't take the party out of the girl
But you can't take the party out of the girl
Paris in the spring and New York in the middle of summer
I don't care where we go as long as everyone is there
And if it feels slow we dance until it sounds like thunder
And when the ground starts shaking
Thats when you know you better beware

So pick me up let's go
Go far away from home
It doesnt matter where 'cause baby I just wanna roam
We're putting on a show
Varieties and vogue
Lets do it
Lets do it
Lets do it
You can take the darkness out of the night
You can take the tick-tock out of time
Go and take the angry out of the world
But you cant take the party

You can make a rocket blast into space
You can make the earth into a better place
Go and give me diamonds, rubies, and pearls
But you can't take the party out of the girl
Take me away from the bad day I just wanna play
You can take the darkness out of the night
You can take the tick-tock out of time
Go and take the angry out of the world
But you can't take the party
You can make a rocket blast into space
You can make the earth into a better place
Go and give me diamonds, rubies, and pearls
But you can't take the party out of the girl
But you can't take the party out of the girl
But you can't take the party out of the girl
You can't take the party
