

# Out of Here

## The Junction

One situated amongst a population  
Filled with others and anothers who are just like me  
We're trying to make ends meet  
trying to live our dreams  
working for commodities

But I must admit it scares the living shit out of me  
when people get uptight about stability  
So when you're laying on your death bed will you count it out?  
Cause if so well then you can count me

Out of here, get me out of here right now

I understand the principal of taking care of oneself  
but whatever happened to the days of honest work?  
It's all possession and less about  
Some food for your family and a roof for the house  
It;s like a stab to the heart  
when i have to see what monsters we become in the face of greed  
if money's where the heart is then you can leave me out  
I'll work to evolution while you work your way

Out of here, get me out of here  
Get me out of here  
Right now

Oh how it seems so harsh, measuring a person's worth  
Oh how did we forget? Love is all...

And I want out of your lies....

Out of here, get me out of here right now
