

Ruckus

Endo

Intermolecular structures the cloning of lovers
Secrets and the lies that stem within
The falling of Hitler the infamous killer
Take my soul and rape and fuck me Take it away, don't wait tomorrow
Open your eyes and let me in Stop all this hatred that stands before me
Take what you want me to take inside you
Break what you want me to break before me
Take what you want leave me empty Take it away, don't wait tomorrow
Open your eyes and let me in So you feel empty, so you feel
Here and now to let me in
Here and now someone help me Take it away, don't wait tomorrow
Open your eyes and let me in, let me in
