

Ether

American Supermodel

Verse

Headlights, star lights, red star so far away
Day glow, night show, red star so far away
Welcome in, said gray skin, do you know where you are?
If you do, know it's true, we are not who you are
Chorus
Floating in the ether like an iceberg in black sea.
Was it me? Headlights, star lights, red star so far away
Day glow, night show, red star so far away
Welcome in, said gray skin, do you know where you are?
If you do, know it's true, we are not world apart
Bridge
We've come too far to be alone
We're much too high to be unknown
Hold onto yourself... and you'll be
Chorus (x2)
Was it me?
