

Stars In the Night

Tenth Avenue North

No matter where you lead, we wanna follow You
The trouble is, we forget who we belong to
We chase the wind and tides
We chase the reasons why
Chase the spark inside each other's eyes
Desires are at war
We want that final shore
Sailing on until we find what we've been looking for Hallelujah, we're running to You
On fire from the mercy in Your eyes
And through the dark, singing we are Yours
Your love will lead us through the fight
Like stars in the night
Stars in the night, stars in the night
Lead us through the fight We fix our eyes on what we know is true
That even in our shame, grace makes a way through
Be our obsession, our constellation
You are light in and out of every season
So we keep pressing on with our redemption song
No one can undo what You've done Hallelujah, we're running to You
On fire from the mercy in Your eyes
And through the dark, singing we are Yours
Your love will lead us through the fight
Like stars in the night All our lives for the other side
Where we'll never die
And in the darkest night, we will lift our eyes
The love that lies ahead is more than all we leave behind Hallelujah, we're running to You
On fire from the mercy in Your eyes
And through the dark, singing we are Yours
Your love will lead us through the fight
Like stars in the night
Stars in the night, stars in the night Lead us through this fight
Stars in the night
