

Perfect Day

[Kelis](#)

Perfect day just you and me
Let's make the whole wide world just leave
Turn on the answer machine
We're gonna lay around go nowhere fast Give a little love, right to me
Give a little love, right through me
Give a little love, my baby
Give a little love, come save me Having you right next to me
See you're the only thing that I can see
We fit together perfectly
We're gonna lay around go nowhere fast Give a little love, right to me
Give a little love, right through me
Give a little love, my baby
Give a little love, come save me
Give a little love, give a little love Only you and me, only you and me so happy
Only you and me, only you and me so nasty
Only you and me, only you and me so happy
Only you and me, only you and me Perfect day just you and me
Let's make the whole wide world just leave
Turn on the answer machine
We're gonna lay around go nowhere fast Give a little love, right to me
Give a little love, right through me
Give a little love, my baby
Give a little love, come save me Only you and me, only you and me so happy
Only you and me, only you and me so nasty
Only you and me, only you and me so happy
Only you and me, only you and me Only you and me so happy
Only you and me so nasty
Only you and me so happy
Only you and me Give a little love, give a little love
Give a little love, give a little love
