Can I Come Over

Take 5

I know it's late
But baby my love won't wait
I've gotta get with you
Got to get next to you right now babySo don't tell me you're tired
I'll wake you up with sweet desire
Talking just won't do
I need to see youCan I come over and hold you all through the night
Can I come over and show you what I've got on my mind
Can we get closer and closer till I feel your heart next to mine
Can I, can I, can I come over tonightWe can dance slow
To the slow songs on the radio
We could be staying up
Until the sun comes up
All night babySo don't tell me you're tired
'Cuz I just get what I'll desire
I don't want to sleep
Want you beside me, yeah, yeahCan I come over and hold you all through the night
Can I come over and show you what I've got on my mind
Can we get closer and closer till I feel your heart next to mine
Can I, can I, can I come over tonightWe can talk till the morning
I can love you all night
I don't care what we do
As long as I can spend the night with you
With youCan I come over and hold you all through the night
Can I come over and show you what I've got on my mind
Can we get closer and closer till I feel your heart next to mine
Can I, can I, can I come over tonightCan I come over and hold you all through the night
Can I come over and show you what I've got on my mind
Can we get closer and closer till I feel your heart next to mine
Can I, can I, can I come over tonightCan I come over and hold you all through the night
Can I come over and show you what I've got on my mind
Can we get closer and closer till I feel your heart next to mine
Can I, can I, can I come over tonightCan I come over and hold you all through the night
Can I come over and show you what I've got on my mind
Can we get closer and closer till I feel your heart next to mine
Can I, can I, can I come over
