

# Smithsonian Liver

## Hot Rod Circuit

why am i not surprised by your condition  
when you look at me and ask me what to do  
and i say to you you need to think this through  
last time we had a confrontation it was a suplex situation  
and i'm not going to end up on the ground again.  
i'm staying out of this  
this is your own mess that you've got into  
have a cigarette hope the best turns out for you  
and i say you you need to think this through  
why can't we just laugh forget and move on  
let's make a toast from coast to coast for all the things we've done
