## Stay

## **Natalie**

Take all I give to you, what I have is true

You're the one for me

Everything I feel inside is sweet, you make me love so deep

You're the one for meI can feel it now what it all really means

It's beautiful what we have it's a special thing

I owe you for showing me

Love is real taking me far away to a better placeAnything you want, anything you need, anything your heart desires

I'm here for you, you take me higher

What you feel what you say what you do

When you smile my days are brighter, I'm loving youPlease don't you go away, I want you to stay where your heart remains

Forever tomorrow today everyday don't change

I'm by your side looking in your eyes

Happy together forever I can see my lifeI want you to stay where your heart remains

Forever tomorrow today everyday don't change

I'm by your side looking in your eyes

Happy together forever I can see my lifeNow that I have you here with me, I won't let you leave

I promise you my best

The things you say to me, I melt I can't control myself

I promise you my bestThat I can give complete happiness

So sure not a doubt in your mind that will ever fall

Please let me continue to

Be the one your only one yes the one that will give her allAnything you want, anything you need, anything your heart desires

I'm here for you, you take me higher

What you feel what you say what you do

When you smile my days are brighter, I'm loving youPlease don't you go away, I want you to stay where your heart remains

Forever tomorrow today everyday don't change

I'm by your side looking in your eyes

Happy together forever I can see my lifeI want you to stay where your heart remains

Forever tomorrow today everyday don't change

I'm by your side looking in your eyes

Happy together forever I can see my life
