

My Car

Betterment

Streetlights on, the night air's cool
I'm driving right past my old school
I'm looking for my pack of cigarettes
I'm thinking back on things I've done
 I can't forget the stupid ones
 It seems I do my best by accident
What's that sound? What's that song?
 What's this street I'm driving on
 In my car, in my car?
I miss her feel, her touch, her taste
 I feel the distance everyplace
This distance can't be taken casually
 I take my time, just drive around
 Feeling lost in my hometown
 Every turn I take is comforting
What's that sound? What's that song?
 What's this street I'm driving on
 In my car, in my car?
I'll take a break from all their big plans
My first mistake was listening to them
 I made a mess it's all been proven
 Over and over again
 Over and over again
Streetlights on, the night air's cool
I'm driving right past my old school
Looking for some face I can't forget
 I take my time, just drive around
 Feeling lost in my hometown
 Every turn I take's an accident
What's that sound? What's that song?
