Travellers Tune

Ocean Colour Scene

Where do you go? Buttoned in your favourite coat
Stepping out to a different world and you might be home late
And where are you now? Staring at your favourite box
The one with the traveller's cross on the road past the gateBut if you find yourself standing on the corner
While you're thinking of a different world
Then you might see me waiting on the corner
Staring through you in your different worldAnd if I could swim then I'd go out and find my boat
Sail away to my favourite coast and let you all in
And if I could do all the things you're asking for
Then, maybe I'd find your door and bring it home to youBut if you find yourself standing on the corner
While you're thinking of a different world
Then you might see me waiting on the corner
Staring through you in your different worldBut if you find yourself standing on the corner
While you're thinking of a different world
Then you might see me waiting on the corner
Staring through you in your different worldSo where do we go? Like two Christophers in the snow
Yeah, we're blind but we want to know just to say, "I love you"
And all of our lives we'll sail through the suns and moons
To sing our 'Travellers Tune', just to say, "I love you"But if you find yourself standing on the corner
While you're thinking of a different world
Then you might see me waiting on the corner
Staring through you in your different worldBut if you find yourself standing on the corner
While you're thinking of a different world
Then you might see me waiting on the corner
Staring through you in your different world
