What Was I Thinking

Swampmeat

I feel so dirty in my hotel room
I got a king size bed that smells like cheap perfume
And I say to myself, "Tyler what were you thinking"
(Tyler what were you thinking)

My head is heavy from all the drinks last night
I had two too many JÃ¤gers I don't feel so right
Am I crazy as hell or is the whole place spinning
Oh I just made a big mistake
I am caught in a nightmare wide awake

I've got girls outside my window
And girls outside my door
I got a life that's too damn easy
And I can't take it anymore
Yeah I got a house in every city
Got so much to lose
I got everything any guy could want
But all I really want is you

I'm feeling guilty for all the things I've done
I've got a stomach full of knots and cold heart is numb
Can I live with myself or will I get what's coming

I say I'm sorry and that there's nothing to fear
But it all went to hell without you here
And I'm hating myself so I guess I'll keep drinking
So please just stay and forget this day
'Cause you can't be the one that got away

I got whiskey on the table
And whiskey on the floor
I got friends who will forget me
Banging on the tuba's door
Yeah I got a house in every city
I got so much to lose
I got everything any guy could want
But all I really want is you

What was I thinking

What was I thinking
What was I thinking
When all I really want is you

Please, please come and save my soul tonight
Please, please come and make everything right

I got girls outside my window
And girls outside my door
Got girls just dying to take their clothes off
Yeah I got a house in every city
I got too much to lose
I got everything any guy could want
But all I really want is you

What was I thinking
What was I thinking
What was I thinking
When all I really want is you

What was I thinking
What was I thinking
What was I thinking
Yeah when all I really want is you

(Tyler what were you thinking)
