I Still Love

Basshunter

I still love when I'm caught in every beat of your heart
I still love when it's dark and you're not alone
I still want you, I'll hold you every step of the way
I'm still yours 'til the end, I still love, I still love, I still love
I still love
I still love when I'm caught in every beat of your heart
I still love when it's dark and you're not alone
I still want you, I'll hold you every step of the way
I'm still yours 'til the end
I still love when I'm caught in every beat of your heart
I still love when it's dark and you're not alone
I still want you, I'll hold in every tear that I cry
I'm still yours 'til the end
My life is a mystery but I cannot run from my destiny
Oh babe, I just wanna let you know
I still love when I'm caught in every beat of your heart
I still love when it's dark and you're not alone
I still want you, I'll hold you every step of the way
I'm still yours 'til the end
I still love when I'm caught in every beat of your heart
I still love when it's dark and you're not alone
I still want you, I'll hold you every step of the way
I'm still yours 'til the end
I still love when I'm caught in every beat of your heart
I still love when it's dark and you're not alone
I still want you, I'll hold in every tear that I cry
I'm still yours 'til the end
I still love
