

# Event Horizon

## Stitched Up Heart

See the world from afar  
Like dust from a star  
Seduced by the sun  
Will we ever find out who we are?  
Fading into space  
And something is grabbing meSpinning violently out of control  
Just can't get a hold  
Slowly pulling into the unknownI can't believe  
This is happening to me  
Another change  
For me to see infinity  
The past is gone  
I can feel it moving on  
Another chance for me to start again  
Moving through the event horizonInto the abyss  
There's much more than this  
I am ready so take me  
Take me into the nexusSpinning violently out of control  
Just can't get a hold  
Slowly pulling into the unknownI can't believe  
This is happening to me  
Another change  
For me to see infinity  
The past is gone  
I can feel it moving on  
Another chance for me to start again  
Moving through the event horizonNow I'm not afraid of the unknown
