

# In the Name of the Future

## The Kovenant

In the name of the future  
Confused the angel beholds the master  
The little people are coming for me  
Behold the curse of mortalityIn the name of the future  
Death to the world - Death to the worldIn the name of the future  
Confused the prophet beholds his disaster  
The man inbetween is looking for me  
Destroyed in the end I ceased to beIn the name of the future  
Death to the world - Death to the world  
This world is a will to power  
This world is a will to power"I used to be the God of the heavenly children  
Playing wicked games in the garden of Eden  
But their apple went rotten down to the core  
So with hands outstretched they begged for more  
Then I gave them the Messiah to teach them the Word  
He was born like a butterfly... died like a worm  
My kingdom rusted - The heavens burned  
So now I sit here watching the end of the world"In the name of the future  
Confused the angel beholds the master  
The little people are coming for me  
Behold the curse of mortalityIn the name of the future  
Death to the world - Death to the world  
This world is a will to power  
This world is a will to power
