

# Electricity

## Orchestral Manoeuvres in the Dark

I want some, some energy  
The ultimate discovery  
Electric blue for me  
Never more to be freeElectricity  
Nuclear and HEB  
Come fuels from the sea  
Wasted electricityI want some, some energy  
Electricity  
All we need is to learn to save  
And if a man would throw awayIt doesn't change the city cost  
The alternative is only one  
The final source of energy  
Solar electricityElectricity, electricity  
Electricity, electricity  
Electricity
