

We Will Overcome

Thursday

We walk away till the end of night
It's suicide but we will overcome
Another life swingin' in the breeze
The southern trees and the strangest route Follow the path of straight and narrow
Hand in hand
Our roads are paved with broken arrows
We will overcome, we will overcome Our father's plan, arms in foreign soil
Our brothers die and no one knows where it ends
(It ends between the crossroads)
Our lives, weave a thousand deaths around us Follow the path of straight and narrow
Hand in hand
Our roads are paved with broken arrows
We will overcome, we will overcome Follow the path of straight and narrow
Hand in hand
Our roads are paved with broken arrows
We will overcome, we will overcome
We will overcome if no one sleeps tonight We will overcome
We will overcome if no one sleeps tonight We will run for years
We waited too long to see the promised land
We can win the war
We were standin' in the promised land We, we will overcome
Overcome
