

Vintage People (Demo)

Eisley

I have laughed up galaxies, hats and glasses
But I've never met anyone quite like you
I've met vintage people who boast of shipwrecks and bravery
But I've never met someone quite like you
You can take me away from here And do you remember, how it was
When we were fascinators, sneaking glances?
Do you remember, how it was all night
While I sing my song, 'til our songs were done? All the people gathered to watch you smile
And take photographs for remembrance
Could they testify with experience they would find that
They've never met someone quite like you
You can take me away from here Do you you remember, how it was
When we were fascinators, sneaking glances?
Do you remember, how it was all night
While I sing my song, 'til our songs were done? And do you you remember, how it was
When we were fascinators, sneaking glances?
Do you remember, how it was all night
While I sing my song, 'til our songs were done? And it's just nice to be near you
'Til the sun breaks our city street through
