Even

Dispatch

Come now to the edge of the road
You can see them all crowdin' around
Soon they'll come in and come up here
Let them find an effigy but they'll never find me
Head man I live to see you roll away
They'll never ever ever find me
They'll never ever ever find me
Headman, walking, right in front of me
Don't you look in, I'm not here you see
Deadman told me where I am to hide
Said he's waitin' there, where it's all
Even
You can feel them coming
Up through your heels
Outside misconstrued, the search continues
The hidden afraid are never betrayed
By the already found and taken away
Oh, and in a different place the hands that hold your face
Are only trying only tryin' to keep you warm
They'll never ever ever find me
They'll never ever ever find me
Headman, walking, right in front of me
Don't you look in, I'm not here you see
Deadman told me where I am to hide
Said he's waitin' there, where its all
Even
Walk on, will we, walk on with our heads to the wall
Let them find that they'll never find us all
Hey I wanted a life less hidden
They wanted a life but I'll never give them
Part of me
Part of me
I will save my right
So hard to the ground
Till we all lay down
Till we lay ourselves down
