Love Never Dies

Randy VanWarmer

I never knew how long a day could be
It was winter and the sun was shining
Beyond the shadows I could see
It was winter and the wind was blowing
Love never dies
I know that true love never dies
The seasons end and time moves on
But true love never dies
I look at a picture I took of you
Now it's winter and the color's fading
I just sit here while the wind blows through me
No matter how hard I try
Can't stop this feeling
Love never dies
I know that true love never dies
A day comes to an end and time moves on
But true love never dies
But true love never dies, never dies
Now I don't want to be
Wanting you
It's been three winters
And my heart's still crying
Love never dies
I know that true love never dies
A day comes to an end and time moves on
But true love never dies
But true love never dies
True love never dies
Love never dies
Love never dies
Love never dies
Love never dies
