

Just Run

DevilDriver

Just run!!
Just run!!
Just run!!
Just run!!Courage without conviction
Is apathy at best
Better move with a quickness
Or get shit-canned like the rest
No one taught you how to run with the pack
So blaze your own trail down
Catch yourself if you slip
Chances are there'll be no one aroundGet out, leave it far behind
Get out, leave it far behind
Get out small townRun now...to save your soul
Run now...to take control
Run now...to save your life
Run now...it's do or die
Just run...The grass is greener on the other side
No one here gets out alive
It's up to you to survive
There's a monster on your sideGet out, leave it far behind
Get out, leave it far behind
Get out small townRun now...to save your soul
Run now...to take control
Run now...to save your life
Run now...it's do or die
Just run...I've got faith on my side
Destiny on my side
I know it's getting better
I can feel it getting better
It can't get much worse
It couldn't get much worseThis time I'm gonna runRun now...to save your soul
Run now...to take control
Run now...to save your life
Run now...it's do or die
Just run...
