

# It's Over

## Radial Angel

she's packed and she's ready to go  
just one more word and she's out that door  
and she's waiting on, this word  
to come right out of her fathers mouth, he throws it out  
she's gone, she's out there in this crazy world  
she's all alone, oh she's all alone(chorus)  
but i, can't wait to see your face  
i'll never look away  
it's not over, till it's over  
well it's overjust one more night of this, she swears she's just going  
to quit  
and she's tired of, oh tired of this lonely world  
but there's one way out, that i know  
i feel it now deep in my soul and i wish that i  
oh, wish that i could show her no more bleeding from her fathers hands  
she finally escaped him  
well she broke down on the sofa  
well it's over
