Pride

Espen Lind

Can you hear me calling out tonight
trying to make it right
and right all the wrongs that I've done
There are times when life gets out of hand
not the way you planned
not the way that you wished it would goIt's like I'm seeing your face on every corner
and I just need to knowDid I mess with your head
Was it something I said
Did I hurt something there deep inside
If I had played by the rules
Stopped acting a fool
Would you still be right here by my side
If I hurt your pride
I appologizeDo you ever stop to think of me
Do you still believe
that we made the world go around
Now the ghost that you have left behind
Haunts me all the time
So pleas tell me what I should doCause I'm still hearing your footsteps in the hailway
and I just need to knowDid I mess with your head
Was it something I said
Did I hurt something there deep inside
If I had played by the rules
Stopped acting a fool
Would you still be right here by my side
If I hurt your pride
I appologizeIt's like I'm seeing your face on every corner
and I just need to knowDid I mess with your head
Was it something I said
Did I hurt something there deep inside
If I had played by the rules
Stopped acting a fool
Would you still be right here by my side
If I hurt your pride
I appologize
