

This Is the First Thing

You Me at Six

Come a little closer
As the night gets older
Of you I grow fonder

Just let my hands wanderThis is the first thing I thought

This is the last thing that I want
You were the first one I loved
You were the first love I lostYou left it too late
To change the way I think
I'll never say never again

These words will never ever pass my lipsThis is the first thing I thought

This is the last thing that I want
You were the first one I loved
You were the first love I lostThis is the first thing I thought
This is the last thing that I want
You were the first one I loved

You were the first love I lostThis is the first thing I thoughtThis is the first thing I thought

This is the last thing that I want
You were the first one I loved
You were the first love I lostNever say never say never again
I'll never say never say never again
Never say never say never again
I'll never say never say never again
