

Nerve

Half Moon Run

Call it liberation or frustration
As it hits like a bomb
Tearing you apart as you're first in line
Entering the zone Watch how it runs
A nerve wrecking resistance
Watch how it burns
A venomous script's getting formed You've traveled a long way to get here
And now its waking you up
Waking you up Walk straight for a final solution
Walk straight, don't you be so cold
Walk straight with a clear resolution
I'll state my case and never turn Watch how it runs, watch how it burns
And it's all a deception
Break it and learn, there's no return
For a presence like mine You've traveled a long way to get here
It's getting all so clear now all the things at least
An elapse of conscious progress will last forevermore My courageous insanity follows an infinite time
I'll be attaching the world on my shoulders
Without a look inside
Inside Walk straight for a final solution
Walk straight, don't you be so cold
Walk straight with a clear resolution
I'll state my case and never turn Walk straight for a final solution
Walk straight, don't you be so cold
Walk straight with a clear resolution
