# Dark Signs

## Prong

Be careful what you want, it may be what you get
Be careful of yourself, you may just kill yourself
Watch out for all the ruin that you ask for
Being trapped below, is that what you need?Careful what you get, it may just get you back
How much more? Relive the nightmares of the past
Think twice about the ruin that you ask for
Still ignoring all the warnings you seeLifetime wronged you, dark signs warned you
Feel me, self destructYou're gonna get exactly what you're gonna let
You suffer more and more and then you blame yourself
Those signposts that point to disaster
Ignore the signals, you get what you seeLifetime wronged you, dark signs warned you
Feel me, self destructGotta self destruct, gotta self destruct
Gotta self destruct, gotta self destructDark signs warned you, feel me, self destructBe careful what you want, it may be what you get
Be careful of yourself, you may just kill yourself
Watch out for all the ruin that you ask for
Being trapped below, is that what you need?
