

Nation On Fire

The Bruisers

It's summer time and the country's on the line
The lads are on the streets and the riots doing fine
Picking up the pieces after the night
Picking up the pieces for another fight
The bricks beat down in the boys in blue
There's no escape they're coming for you
The walls come crashing 'round your head
It's war on the streets and they're running red
Police are running facing defeat
Cities burning in the summer heat
Police are running facing defeat
Cities burning in the summer heat
The crowd is screaming, you can hear all their cries
There's no way to stop tear gas clouds
Police are running, facing defeat
Tears are falling in the summer heat
Police are running facing defeat
Cities burning in the summer heat
Police are running facing defeat
Cities burning in the summer heat
The bricks beat down in the boys in blue
There's no escape, they're coming for you
The walls come crashing 'round your head
It's war on the streets and they're running red
