

What Yo Name Is

Group 1 Crew

Yo introducing the improvement of a natural act
You hear this beat drop and watch it move the front to the back
And its actually time to react to a crew thats in fact
Bringing back the illest raps we know the industry lacks So what you know about this hotness
Standing in the back bumpin fists, I bet you didnt know
That we would come with this, hip-hop with a twist
Hey DJ you better make 'em dance to this Turn it up, turn it up, put down all your stuff
Not sweatin hard enough you gotta work it up
Here we go to the floor, I tell you once more
Chop it up 'cause you standing like a vegetable Hot like safari, shop like a Gotti
We walk in and shock everybody
Me and my boys, ya we rock the party
Soon as we start to run everybody say Ooh, what yo name is, who you came with?
Cant stop movin' your crew they make me say
Ooh, where your team stay, can you work with me?
Just come with us and let us lead the way We got that swagga thats hotta than summer time in Nevada
We rockin shows that are harder than most of the stars y'all follow
Aint to stopping the power of three destined by the Father only
To make yall sing a melody that carries volume We laid low for a while but we couldnt hide the style
Of two emcees a vocalist who bring that funky sound
Check your local listings 'cause we comin to your town
Bringing something new that got the earth shaking its ground See who you know can rock a crowd the way we do
Then go to Cali and make Hollywood pump its fists too
Fill up a secular venue and get love from them too
And not for a moment ever have to sacrifice the truth Hot like safari, shop like a Gotti
We walk in and shock everybody
Me and my boys, ya we rock the party
Soon as we start to run everybody say Ooh, what yo name is, who you came with?
Cant stop movin' your crew they make me say
Ooh, where your team stay, can you work with me?
Just come with us and let us lead the way Due this is Group 1, one mind better believe that we on time
Never we bringin the weak rhymes baby you know these are hot lines
Mind over matter batter-up get a grip
Our God is wit it, get it krunk and play it loud in your whip They call us spiritual but miracles are all we predict
When spiritually we turn our faith into a physical hit
And got the whole world askin who we are and our click
Its quick to admit that Hes the reason why we exist, it's like Ooh, what yo name is, who you came with?
Cant stop movin' your crew they make me say
Ooh, where your team stay, can you work with me?

Just come with us and let us lead the way
What yo name is, who you came with?
Where your team stay?
