

# X-ray

## Black Lab

How come you never look at me no more?  
Take it easy, babe, go slow now  
How come you never touch me anymore?  
Take it easy, you don't want to know now  
How come you never break the skin no more?  
Take it easy, babe, don't go now  
How come you never let me in no more?  
Take it from me, I'll break it to you slow now  
She looks through me like an x-ray  
Like a fire burning out of the fireplace  
She looks through me like x-ray  
I'm saying all the right lies to the wrong face  
How many faces can you fake, boy?  
How many lies? How many know now?  
Say how can you never make a choice?  
I'll break it to you slow, now  
She looks through me like an x-ray  
Like a fire burning out of the fireplace  
She looks through me like an x-ray  
Like a surgeon come tearing at my heartbreak  
Don't be seen with me  
She sees everything  
Don't be seen with me  
She sees everything  
Yeah  
She looks through me like an x-ray  
Like a fire burning out of the fireplace  
She looks through me like an x-ray  
Like a surgeon come tearing at my heartbreak  
Break, break, break it down  
Take, tear it, tear it down  
Break, break, break it down  
Tear it, tear it, tear it down
