

# Arclight

## VNV Nation

Forget your fears and want no more  
Forget your fears and want no more At first light lay proud foundations  
Sense the greatness that before you unfolds  
Seek no more for hollow answers  
Answers that lay within you all along Farewell to dawns seen through saddened eyes  
Farewell to pasts, to sorrows chained  
Forget your fears and want no more  
You will be strong and want no more You'll be adored, you will have everything  
You will be strong and want no more  
Forget your fears, you will have everything  
And want no more
