Lilacs

Lilacs & Champagne

You were right I was up all night thinking about you Dreamed I choked On your kaleidescope, they still look deadly My fatal flower How the tigers all laughed As I ran along the well-worned path The sapphire eye looks Down on my lilacs, down on my lilacs Down on my lilacs, down on me Down on me, down on In sincere As we rolled for years in turning barrels I washed my hands in the lake As she blew it all away with Roman candles So take your fever Let me wallow alone The callous on your eyes have grown The sapphire eye looks Down on my lilacs, down on my lilacs Down on my lilacs, down on me Down on me, down on And your faults have me stoned Paying rent to your ghost Torn up by a frightened little girl I thought that you were right

So I was up all night thinking about you
I thought you were right
You were right, you were right
You were
You were right
And I was up all night thinking about you
And I couldn't speak
Covered with bees, you flew above me
Figure it all out
I think you've had enough time
I've had long enough to change my mind
The sapphire eye looks

Down on my lilacs, down on my lilacs
Down on my lilacs, down on me
Down on me, down on
And your faults have me stoned
Paying rent to your ghost
Torn up by a frightened little girl
I thought that you were right
And I was up all night thinking about you
You were right
So I was up all night thinking about you
I thought you were right
You were right, you were right
You were
