Public Imagery

Sunk Loto

Its televised, sensationalised and globalised
the beginning of the end is near
its prophesied were terrorised its televised
the beginning of the end is near
global hatred
war on races
everythings so complicated
see it in our televisions
death
destruction
public imagery manipulates society
when will people see
were bein told what to hear
please just be a phase in time
please just televised, prophesised for the public
we are getting close to the beginning of the end
(were politics and war override decency and human compassion)
televised prophesied for the public
we are getting close to the beginning of the end
lonely in a world
so shallow and shamelesswould we televise a fucking war!!!
Public imagery manipulates society
when will people see were being told what to hear
please just be a phase in time
global hatred
war on races
this is getting complicated
watch it on our televisions
televised, prophesied for the public
we are getting close to the beginning of the end
(were politics and war override decency and human compassion)
televised, propheside for the public
we are getting cloe to the beginning of the end
(only in a world so shallow and shameless would we televise a fucking war)
