The Blue

Acid Bath

Across your face
I see what you are
You wanna kill the sun
Blot out the stars
I know you you're nothing
You're so small
You're fuckin nothing
Nothing at allThe sun burns on
It reminds me of you
The slit wrists of the sky
Bleeding into the blueWe twist beneath forever
Do you know what you've done?
Ants in the afterbirth
Slugs under the sun
YeahI could not wake the dead man dreaming yeah
Acid body murdered at the late show oh yeah
Mutate me and breed yourseIves a savior
I could not kill the dead man screaming
Eat my dead cock oh yeah (x2)I have fallen deep in love with the sky
Fragments of a sunbeam glowing on kitchen knife yeah
Leaves will fall as everything must follow
Kill your idol come on jump into the void
Eat my cold shitEverybody whispers were birds fall dead
I smell the yellow sickness churning inside your head
Wiping flecks of foam twisting with rabies
Bloody we run thru fields of dead daisiesHow can I ever make you know what you've done?
Ants in the afterbirth, slugs under the sunI have fallen deep in love with sky
Fragments of a sunbeam glaring on a kitchen knife
