

# Dead To Me

## Music for dead birds

Put on another face, they always take the place  
Of all the things that you have become  
Your instability is nothing new to me

It's always something that made you what you are  
You're dead inside  
You killed your pride

I won't be there  
And no one cares  
Your insecurity

The failure that it brings  
And all your misery

Keeps coming back to me  
Save yourself the pain  
And go away  
For the rest of my life  
Bury you today  
I separate

For the rest of my life  
You give me countless lies and hope I sympathize  
You hit my only nerve and that is all it took

Separation now  
Let it go, you let it go  
New evolution  
Thrown away

You're thrown away, you're gone  
I'm done with you  
don't follow through

I won't be there  
'cause you don't care  
The way you're suffering

Is all the same to me  
Your credibility

Killed your reality  
Your delusion  
Claim confusion

Easier to pass the blame on  
All your hatred  
Seems so wasted

You're the one who's dead inside me  
You're fucking dead to me
