The Antidote

Story Of The Year

Now the damage has been done
And this machine has begun on a path of destruction
We need the medicine to reverse what's been done
Before this disease has destroyed everything we know
Everything we know
All we need is a reason
(All we need is a reason)
All we need is right here inside us all
With our weapons drawn and all our resources gone
We're facing extinction
The only antidote consists of blood, sweat and hope
And a blueprint to save us from all that we've become
All that we've become
All we need is a reason
(All we need is a reason)
All we need is right here inside us all
All we need is a reason
(All we need is a reason)
All we need is right here inside us
Here inside us all, yeah, oh
Now the gears they will fail to turn
As the lights go out
And the sun will be all that burns on our way down
(On our way down)

But right now we have to understand the problem
And overcome
So arm yourself
You'll mind your gun
It's time to learn
Accept what's done, yeah
Repair this destruction
All we need is a reason
All we need is right here inside us
All we need is a reason
(All we need is a reason)
All we need is right here inside us all
All we need is a reason
(All we need is a reason)

All we need is right here inside us all
(All we need is a reason)
All we need is a reason
(All we need is a reason)
Whoa, whoa
(All we need is a reason)
(All we need is a reason)
All we need is right here inside us
Here inside us all
