

# Something To Be

## Rob Thomas

Hey man  
I don't wanna hear about love no more  
I don't wanna talk about how I feel  
I don't really wanna be me, no, no more  
Dress down now I look a little too boy next door  
Maybe I should try to find a downtown whore  
That'll make me look hardcore  
I need you to tell me what to stand for  
I've been looking for something  
Something I've never seen  
We're all looking for something  
Something to be  
Hey man  
Play another one of those heartbreak songs  
Tell another story how things go wrong  
And they never get back  
My pain is a platinum stack, take that shit back  
You don't wanna be me when it all goes wrong  
You don't wanna see me with the houselights on  
I'm a little too headstrong  
Stand tall, I don't wanna get walked on  
I've been looking for something  
Something I've never seen  
We're all looking for something  
  
Something to be, something to be  
Well I can't stand what I'm starting to be  
No, I can't stand the people that I'm starting to need  
There's so much now that can go wrong  
And I don't need nobody trying to help it along  
It's the same old song  
Everybody says, you've been away too long  
Everybody wanna tell you what went wrong  
Wanna make you like an icon  
Till you believe that they're right  
I've been looking for something  
Something I've never seen  
We're all looking for something  
Something to be

I've been looking for something  
Something I've never seen  
We're all looking for something  
Something to be  
Something to be
