

When I Think of You

Tripping Metal

When I get this feeling down below
I lock my bathroom door
Thinking of ways it used to go
Burning me up from head to toe
When I think of you
When I think of you
When I think of you
When I get this feeling down below
I pounce, you take control
We bounce back to and fro
We clean the dirty floor
When I think of you
When I think of you
When I think of you
If there could be a way to find you
You know I'd be driving right behind you
You know I'd be looking out for danger
We could pretend that we're both strangers, I won't say a thing
When I get this feeling down below
I'm ready to explode
We drop like dominoes
Stimulate my frontal lobe
When I think of you
When I think of you
When I think of you
When I get this feeling down below
Right back against the door
Slap back delay I go
You crack my inner code
When I think of you
When I think of you
When I think of you
If there could be a way to find you
You know I'd be driving right behind you
You know I'd be looking out for danger
We could pretend that we're both strangers
If there could be a way to find you
You know I'd be driving right behind you
You know I'd be looking out for danger

We could pretend that we're both strangers
If there could be a way to find you
