

# Get In the Car

## Echo & The Bunnymen

Let's go and take a starlit drive  
To where the shaping of our lives  
Had just begun when we were young When everything was coming right  
In our dreams of love and life  
And we could run into the sun Get in the car  
We're taking a ride  
We're looking for stars  
We're looking for satellites  
Of love  
Of love Changes coming, changes gone  
We just want to be someone  
Behind the tears, behind the tears Nights and days go on and on  
And things are coming out all wrong  
And no one hears, and no one hears Get in the car  
We're taking a ride  
We're looking for stars  
We're looking for satellites Get in the car  
We're taking a ride  
You'll be the star  
I'll be your satellite  
Of love  
Of love Let's go and take a ride  
To all those starry nights  
We used to fly upon when we were young When everything was coming right  
In all our dreams of love and life  
And we would run into the sun  
Nothing's gonna get me down
