Simple Disobedience

Alice Cooper

Looks like all your laws are broken, all your lines are down
And all your officers are shook up babbling little clowns
Looks like all your power's gone, it's sprayed upon the wall
In blood and spit, it spells out your inevitable fallAnd all the hungry outlaws have taken up a stance
Simple disobedience
Yeah, all the hungry outlaws have taken up a stance
Simple disobedienceNow all your complex little schemes that form your master plan
Are scrambled up and that is something you don't understand
A cyclone of confusion rips right through your holy troops
The very thing that weakens you gives power, gives me juiceAnd all the hungry outlaws have taken up a stance
Simple disobedience
Yeah, all the hungry outlaws have taken up a stance
Simple disobedienceTake your laser microscope and try to find an answer
No antidote or drug to cure our special strain of cancer
It spreads its revolution wide from cell to cell to cell
Your kingdom's like your body man it dies and goes to hellAnd all the hungry outlaws have taken up a stance
Simple disobedience
Yeah, all the hungry outlaws are waiting for a chance yeah
Simple disobedienceAnd all the hungry outlaws have taken up a stance
Simple disobedience
Yeah, all the hungry outlaws are waiting for the chance
Simple disobedience
