

Oblivion

Macy Gray

It's real sick
The state of the world today
It's real thick
To come up and find a way
Solution
The next time you're alone
You can
Create a world of your own Make it magic, give it love
Make it all you're dreaming of Everybody
In my underwear
Sometimes I visit there
Oblivion
Ignorance is bliss
Don't know nothin' but this
Oblivion Forget
Bounce from right to left
Here with the broken hearted
Let's get this party started La la la la la la
I eat my marimbas
Oblivion
I tingle when I sing
Bling bling bling ting ting
Oblivion Forget
Bounce from right to left
Here with the broken hearted
Let's get this party started It's tempting to pack up your throne
Move in
Make this magic place your home, oh
But nobody else can go
You'll be forever all alone, oh Forget
Bounce from right to left
No longer broken hearted
And I don't know when it started La la la la la la
Oblivion
La la la la la la
Oblivion
